

Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

Systems Engineer

for our **Product Development**

You develop and control all stakeholder and system requirements as well as the functional and physical system architecture for our devices in interaction with marketing and R&D. You will act as an important interface between the various stakeholders as well as the technical domains of software, electronics, and mechanics and create the necessary technical documentation. You will coordinate and manage individual projects or sub-projects. You will support business development by monitoring relevant activities in R&D and contribute to the development of the program strategy.

- You have an engineering degree (ETH/FH) in a relevant field specializing in systems engineering, electrical engineering, software, or microtechnology.
- You at ease with the targeted development of system concepts and specifications, including performance, security, and reliability.
- You have experience as a development engineer or project manager in multidisciplinary projects
- You are enthusiastic about grasping and demonstrating complex interrelationships and are a very independent, solution-oriented, and analytical team player with the initiative as well as pronounced target group-oriented communication skills.
- Experience in software or system architecture and the creation of documentation, ideally in a regulated environment, is a plus.
- Knowledge of regulations or standards such as US FDA Quality System Requirements, ISO 13485, ISO 14971, IEC 60601 is a plus.
- Several years of professional experience in a similar function are an advantage, but not a prerequisite.

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!
