

## **Innovation is our passion.**

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

## **Manager Manufacturing and Supply Chain**

for our **Biotech and Medtech business**

At our headquarters in Urdorf (Zurich), Switzerland, our engineers innovate next-generation technologies that change how biopharma digitizes and automates bioprocess development. Our vision is to maintain this leading position and stand out significantly from all other bioprocess software applications and automated sampling systems.

Do you have a curious mindset driving you to constantly learn and challenge the status quo? Are you interested in establishing our new supply chain structures and processes as well as lead our new manufacturing team to further strengthen our leading position in this high-tech life science market?

In this new function, you are responsible for setting up all procurement activities for our production and F&E as well as the maintenance of the supplier relationships, which you continuously optimize. You identify and realize savings potentials, establish, and maintain price lists, ensure the required quality and update the data in our ERP system. You are also responsible for the development and implementation of our new manufacturing infrastructure and processes as well as the management and organization of our warehouse logistics.

You enjoy analyzing processes and structures to optimize COGS and increase product quality.

### **Your profile**

- Industrial business management or logistics specialist with basic technical training (e.g. automation) and/or job-specific further training in purchasing, logistics, supply chain
- Experience with manufacturing
- Customer- and service-oriented mindset
- Good negotiating and strong communication skills in English and German. Any other languages are a plus
- Very good MS-Office knowledge and experience with ERP systems
- At least 5 years of professional experience in a comparable function
- Experience in project management is a plus

### **Our offer**

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!
