

Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

Product Specialist

for **Numeria**[®], our automated sampling system for bioprocess development.

You are responsible for all project management around our Numeria[®] PAT system and plan, schedule, and coordinate projects. You support our Field Engineer in the installation and maintenance of Numeria[®] systems, user training, application support, and technical support for our worldwide direct customers and distributors. Based on customer experiences and needs, you will further develop and optimize Numeria and personally collaborate with development project partners in academia. You supervise production and ensure quality control.

- You have earned an engineering degree in biotechnology (or comparable), very good knowledge of bioprocesses and analytical methods (PAT) as well as strong technical and IT skills.
- You feel at ease with the fundamentals of electromechanics, design, and (SPS-) programming.
- You are willing to embrace travel activities of 30-40% (Europe, North America, Asia)
- You like to work independently and use your strong problem-solving abilities in a goal-oriented way while collaborating and communicating well in an international and intercultural setting.
- 2-3 years of professional experience in a similar function is a plus, however not a prerequisite.

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!
