

Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for an

Bioprocess Application Specialist

for **Lucillus PIMS**, our process information management system for bioprocess development.

As a super user for our software platform, you play an important role in customer interactions (application support, project execution) as well as documentation. The documentation includes user or technical manuals, release notes and training material. In close collaboration with the software development and testing departments you stay up to date on Lucillus' vast digitalization capabilities and help converting it into improved bioprocessing workflows together with our industry customers. The position offers a splendid entry into our biotech product offering with potential to develop your role in various directions.

- You have a bachelor's degree in biotechnology or a similar education with good knowledge on bioprocessing
- Hands-on experience in the (regulated) biopharma industry is a great plus
- You feel at ease with the English language, both in spoken and written
- You like to work independently and use your strong problem-solving abilities in a goal-oriented way while collaborating and communicating well in international and intercultural settings.
- You have an affinity for IT & software and a fascination how the industry transforms towards more digitalization.

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues and a true purpose. We are looking forward to hearing from you!
