Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the medtech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

Software Engineer

for **Lucullus PIMS**, our process information management system for bioprocess development.

You will support our software development department in the development of independent modules and services, implement communication protocols as well as UI components. You are an all-rounder who is familiar with the development of databases, business logic as well as independent console- and UI applications. Furthermore, you will handle 3rd level support problems for our customers.

- You have a degree in computer science, or a successfully completed apprenticeship as a computer scientist or an equivalent IT education and several years of working experience.
- Programming in C++, several years of professional experience.
- Knowledge of automation / communication protocols advantageous
- Preferably you have experience with Qt, Python and SQL.
- Experience with (bio-)process engineering is an advantage, but not a prerequisite.
- Operating system knowledge of Windows and Linux.
- You like to work independently and use your strong problem-solving abilities in a goal-oriented way while collaborating and communicating well in international and intercultural settings.

Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!
