

## Innovation is our passion.

Securecell is the trusted partner for biopharma, enabling them to bring new therapies to patients in a safe, efficient, and economical way. We innovate ground-breaking measuring and control engineering technologies to radically improve bioprocessing, medical treatment, and patient health. For more than 25 years, we have been delivering innovative solutions in bioprocess control for biotech, pharma, and academia. This expertise and experience provided the fundament for the technology transfer into the MedTech space and the development of Seraccess, a truly disruptive diabetes therapy.

Continuing steadily on our sustainable innovation path and growth journey, we are looking for a

## Mechanical Engineer

for our Biotech and Medtech business

At our headquarters in Urdorf (Zurich), Switzerland, our engineers innovate next-generation technologies that change how biopharma digitizes and automates bioprocess development. Our vision is to maintain this leading position and stand out significantly from all other bioprocess software applications and automated sampling systems. Do you have a curious mindset driving you to constantly learn and challenge the status quo? Are you interested in product development as well as support our engineering Team to further strengthen our leading position in this high-tech life science market?

In this function, you will turn the multidisciplinary requirements for our new products into great mechanical designs, as well as build functional models and prototypes to challenge and validate your concepts. You are responsible for the mechanical design workflow and its proper documentation. You support and guide our suppliers to manufacture the parts in time and above all in the necessary quality.

### Your profile

#### Required Knowledge, Skills, and Experience

- Degree as mechatronic/mechanical engineer FH/HF
- High proficiency in SolidWorks CAD design
- Application of mechanical design standards such as ISO and ANSI, applying GD&T best practices to mechanical drawing specifications
- Over 5 years of relevant work experience
- Fluent in English and German

#### Preferred Knowledge, Skills, and Experience

- Familiar with Solidworks PDM strongly preferred
- Hands-on experience in manufacturing processes and prototyping
- Experience with small scale fluid handling, thermal budgets, electromechanical mechanisms
- Knowledge in bioprocessing and analytical technologies is a big plus
- Working experience in regulated environment preferred

### Our offer

Securecell offers a highly diverse international working environment and the opportunity to collaborate with highly skilled individuals from various disciplines. Partnership and interdisciplinary collaboration are at the core of our company, our research activities, and the commercialization of our marketed products. We nurture true innovation and creative thinking to advance our research projects as well as to continuously improve our marketed products. At Securecell, you will discover a challenging job, inspiring colleagues, and a true purpose. We are looking forward to hearing from you!

Please submit your detailed curriculum vitae to [hr@securecell.ch](mailto:hr@securecell.ch)

### Job location

Securecell headquarters are in Urdorf (Zurich), Switzerland.
